Office Action Summary

Part of Paper No. 8

Art Unit: 1722

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification fails to provide antecedent basis for the subject matter of claim 4.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the biasing means to bias the member must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Sakurai.

Sukurai discloses a mold comprising two halves (2a,2b), each of the mold halves comprising a biased removable ejection pin 3 having a contact section which is adapted to contact a surface of a semiconductor chip mounted in the mold. See Fig. 4A which shows the pins 3 in a removed position and Fig. 4B which shows the pins 3 in an extended position. The mold also forms a contact section with the chip P to minimize seepage between the mold and the chip as shown in Fig. 3B.

Art Unit: 1722

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
